5/31/77

Dear Emory,

Correct. FOIA. They are still holding back the stuff on/about me.

I'll be referring a stranger to you on crypotgraphy. I think you once had this interest.

His letter to me was delayed something more than a year by the route renumberings.

Came today, via Bud, to whom he wrote.

We have duplicating requests re LHO's military career. You push.

On this I'd like to correct and in this strengthen what you said, that all the men in LHO's outfit had topssecret clearance.

According to his commanding officer in radar he was one of five only cleared for the work he did. The testimony is at least secret. My SF source, Oswald in New Orleans, is that it was both crypto and top secret.

You are correct about the lack of any record of any security check.

I believe that except for the simple statement of the fact of it there also is no record of his advanced training at Keesler Field.

Hastily, with best,
